EXPERIENCE

PYTHON DJANGO DEVELOPER

Techgebra solutions

March 2023- November 2023
Cyberpark,calicut

- Developed and maintained RESTful APIs for an e-commerce platform using Python and Django, enabling seamless communication between the front-end and back-end systems
- Led and managed the successful implementation of an ERP system for a medium-sized manufacturing company, streamlining business processes and improving operational efficiency

PROJECTS

CLINIC MANAGEMENT SYSTEM

- Implemented a user-friendly web interface for healthcare professionals to manage patient information, medical history, and appointments efficiently.Utilized the Django framework and MySQL for database management, ensuring data integrity and security.

TG-ECOM

- TG-ECOM is an ambitious and innovative e-commerce project developed using Python and the Django framework. This project aimed to create a dynamic online platform for users to discover and purchase a wide range of products, revolutionizing their online shopping experience.

STUDENT MANAGEMENT SYSTEM

- Implemented a web-based platform to manage student enrollment, attendance, grades, and course schedules.Utilized PHP for backend development, and HTML/CSS for the user interface.
